## **Remote Factory Acceptance Test system by Easy Inspect AS**

For the past year we, at Hydra-Grene A/S, have offered our customers the possibility of attending Factory Acceptance Test (FAT) from anywhere in the world.

Via an internet based monitoring system, delivered by Easy Inspect AS, our customers in, among others, the Norwegian offshore, has had the opportunity to follow FAT's from their office, their homes, ships, offshore rigs etc. All that is needed, is an internet connection or an app for an Apple or an Android phone or tablet.

Whether our customers has purchased a smaller sized compact HPU, or a large advanced Atex HPU for rig installation, the customer can follow the procedure of the test from four different cameras in our test facilities. From four different cameras, either one chosen just by clicking on the icon of the camera angle of choice, the test is followed visually, and there is oral contact to the test engineer as well.

At Hydra-Grene A/S, we have had great feedback on this feature. We save our customers time and money. Furthermore, the customer can see the assembly work as it progresses, and if necessary suggest changes.

The monitoring system of Easy Inspect AS comes highly recommended by Hydra-Grene A/S.

Kind regards.

Hydra-Grene A/S  
Hans Thomsen
